History

Celebrating over 100 Years of Service.

It survived the Depression. It survived a fire that consumed three-quarters of the company's stock.

But perhaps most surprisingly, Cyrus R. Fox Lumber has survived Home Depot—not only survived but thrived.

Not many companies can claim four generations of family ownership and success in an age of big-box stores, but this century-old lumber yard and hardware supply company has kept success moving from father to son.

The company, a fixture in Clinton, is nestled between the South Branch of the Raritan River and Route 78. The premises are rife with historical notes and is rumored to have received wood from the first load of lumber that came through the Panama Canal. The property once housed a Lehigh Valley Railroad station (now a window showroom) and the town's power station.

In 2005 the company celebrated its 100th year in business. The timing was right; the company also had its best year ever with \$22 million in sales. Even adjusting for inflation, the volume of sales was the strongest ever for the company, according to the current owner Cyrus Apgar.

Mr. Apgar is the great-grandson of Daniel Fox, who bought the 5.5 acre property in Clinton in 1905 and founded Daniel S. Fox Lumber and Coal. In the 1920's it became Fox Brothers Lumber for Mr. Fox's sons Rhuston and Cyrus. In 1947, Cyrus became the sole owner.

In 1970, after a major fire in 1969 and the subsequent rebuilding, the business was renamed Cyrus R. Fox Inc. The business passed to two of Cyrus' children, Cyrus Jr. and Helen, who had married

Lawrence Apgar. When Mr. Apgar returned from serving in World War II, he joined Cyrus Jr. in running the business along with Rhuston's son Daniel Fox. In 1993, the Apgars bought Cyrus Jr. out of the business. Now the company is "an Apgar family business," according to Mrs. Apgar, but for tradition's sake, the company kept her father's name.

Not surprisingly, the fire was a turning point. Mrs. Apgar remembers the exact day of the fire, not merely because of the devastation, but because it happened on March 1, her wedding anniversary.

Today the business, at any given time, has about three million dollars of on the ground inventory. The company, which has a hardware store, no longer sells coal, having ended that endeavor because of supply problems.

Change has been a key to the business' success, according to Cyrus Apgar, Heln's son and current owner. Rather than a lumber company, he says they are a "building materials" business. The difference isn't merely semantic.

"Engineered wood products is a big thing now," says Mr. Apgar. More and more home builders are shunning wood for interiors, decks or siding, in exchange for composite materials that, while looking like wood, are a mixture of plastics and wood, or cement and wood. He ascribes the change to the new materials being "maintenance free" and available in larger sizes. Also, he notes that trees being cut down now for lumber are much younger than the older-growth trees of yesteryear. "Newer (younger) wood is not as strong," he says.

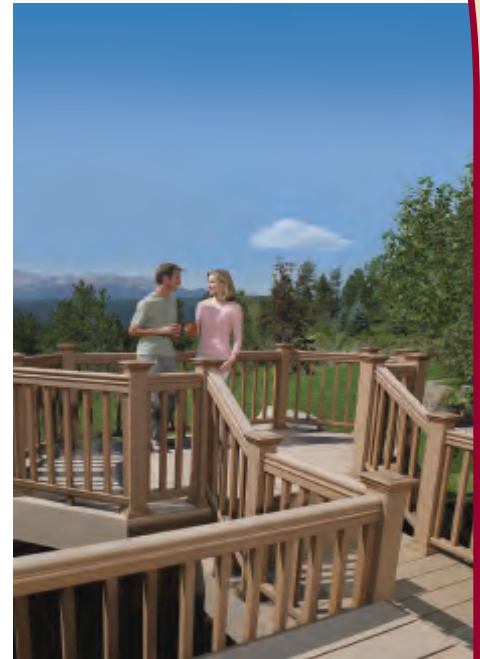

Changing with the times has helped the company to flourish; however, Mr. Apgar says the key to his company's success has not. It is all about "quality service, quality products and good prices." Preferring to work with local businesses, smaller-volume developers and contractors, Mr. Apgar says he is grateful to those who patronize the business, many of them second- or third-generation customers. "We wouldn't be in business this long without our customers. We don't push anyone away."

While Cyrus Apgar has no children, he says his family does plan to keep the business passing through the generations. He owns the business with his siblings: Larry Apgar Jr., Barbara Gates and Patricia Swarts. His brother and sisters aren't involved in the business, but he thinks one of his eight nieces and nephews will carry it on. "We don't know who yet," he said, "but somebody."

Why Andersen®?

PERFORMANCE

Natural Wood

High-Performance™ Low-E4™ glass

Weathertightness

Stormwatch® Protection

LONGEVITY

Design • Testing • Warranty

BEAUTY

Comprehensive portfolio of many shapes and sizes of windows and patio doors

Fill any opening in a way that you envision

Tilt-Wash Double-Hung Windows

400 Series • 200 Series

- With traditional styling and state-of-the-art technology, Andersen® 400 Series tilt-wash double-hung windows give you the beauty of natural wood interiors, weathertight performance and a long-lasting, low-maintenance exterior. The unique tilt-wash system makes cleaning these windows a breeze.
- Solid, dependable and efficient, 200 Series tilt-wash double-hung windows feature tilt-in cleaning convenience, natural wood interiors and chamfer detailing. With a full complement of transom and picture window options, they offer Andersen beauty at an uncommon value.

Casement & Awning Windows

400 Series • 200 Series

Andersen® casement units can be ordered as double and triple units with a single exterior frame skin for an attractive, seamless exterior appearance and jobsite convenience. Casement and awning windows crank open easily to catch passing breezes, and their slender sash help bring the outdoors inside.

- The 400 Series offer the option of white pre-finished or rich wood interior of casement and awning windows.
- The 200 Series offer the option of DPI or Low E glass.

WINDOWS • DOORS
Andersen® 

Options

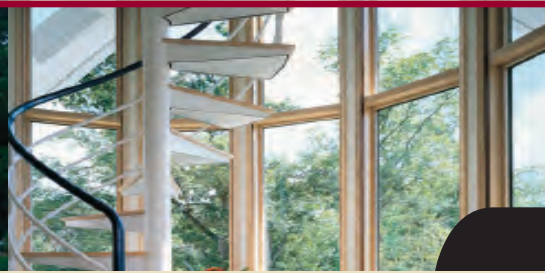

TruScene™ Insect Screens • Grilles • Hardware • Colors

- With over 50% more clarity than conventional insect screens, TruScene® insect screens are virtually invisible, so the view through the windows is as clear as all outdoors. The micro-fine steel mesh also lets more light and fresh air into the home, while keeping even the smallest insects out.
- The Andersen™ divided light program offers a wide array of grille options, from standard patterns to custom designs. They all feature prominently defined profiles for authentic-looking detail.
- An expanded hardware portfolio with more options than ever.
- Choose from many different interior and exterior colors and/or finishes.

Why Marvin?

Transforming a house into a home, one dream at a time. You're building much more than a house. That's why we build much more than a window. Create a magnificent entrance with mahogany entry doors. Update existing space with replacement windows. Or add the perfect finishing touch with designer window and door hardware or other custom-crafted options, each ensuring that every element of your home is completely built around you.

Remodel & Replace

What are your window replacement needs – a dramatic new look, an authentic replication, greater energy efficiency, a low maintenance exterior? Marvin has the replacement window options, sizes and custom solutions needed to turn your remodeling and window replacement dreams into reality.

- Custom capabilities, including special sizes and grille patterns
- Cost-efficient sash-only and insert, replacement window products
- Beautiful wood interiors and virtually maintenance-free exteriors
- Expert window installation

Clad, Colors & Casting

Marvin's 19 clad colors, 9 casing profiles, and 6 subsills give you endless options to enhance your home's curb appeal and express your personal style. Marvin's extremely durable extruded aluminum is substantially stronger than roll-form aluminum and features a protective 70% Kynar® 500 paint finish for superior resistance to fading and chalking.

Windows

StormPlus

States and counties in hurricane-prone regions are adopting stricter building codes to protect residents and property. Marvin understands the complexities of today's codes, and engineers StormPlus products to deliver superior performance, beauty and style.

Architectural Hardware

Marvin Architectural Hardware offers a collection of designer handles to complete our windows and doors, with choices that complement a wide variety of architectural and design styles. Just as importantly, the hardware is engineered to fit and operate flawlessly.

Marvin Architectural Hardware Warranty

Marvin Architectural Hardware products are warranted to be free from defects in manufacturing, materials and workmanship causing mechanical failure of the hardware functionality for a period of ten years from the date the product was originally purchased. Physical Vapor Deposition (PVD) finishes are warranted against tarnishing, pitting, corrosion or discoloration for a period of ten years. Non-PVD finishes are not covered under the ten year warranty.

Windows

Products and Options

Create without compromise.

When only an extraordinary level of service and customization will do.

Whether you're creating something new, recreating history or meeting niche needs, there are times when the windows or doors you envision require a level of customization and expertise that goes beyond the ordinary.

Signature Products

Marvin Signature represents possibilities. The products featured in the catalogue are a very small sample of the custom-designed products that we've already brought from idea to reality. Our millwork specialists and project managers bring years of experience to the process of designing and building products like these – or creating entirely new ones.

Signature Options and Accessories

When you need something totally unique, Signature options and accessories provide custom solutions and endless opportunities for modifying and customizing Marvin products. This suite of solutions goes beyond the design personalization achievable with Marvin's standard options.

Signature Services

Expert project managers and millwork specialists handle projects beginning to end, offering unprecedented, personalized service along the way. Our mastery of every phase of the process means fast, effective prototyping, quick turnarounds, responsive scheduling and delivery - and most of all - products of exceptional quality that are backed by the strength of a national brand.

Windows

Your Windows and Doors... by Kolbe.

Kolbe windows and doors are right for you. Why? Because we offer options. With your choices and our windows & doors, your house will be your home. Most of our products meet or exceed ENERGY STAR® guidelines for energy efficiency for all climate zones. Plus, you may qualify for a federal tax credit.

If you're a professional planning an extensive commercial building project, spec Kolbe. We have a new Commercial Group to personally assist you. Simply sign up on our website to learn more. Then, you'll also have access to drawing files, CSI specs, information about Kolbe's online education, and more.

Whether you're a homeowner, contractor or architect, the word today is green. The Green building movement has generated a maze of information, but Kolbe can help you through it. Learn more about how Kolbe windows and doors fit into green building plans.

We're excited about our newest products – Windquest™ Series windows & doors, and Ultra Pocket Double Hungs. What's so special about them? Windquest Series are vinyl windows and patio doors that meet rigorous impact and design pressure ratings. Ultra Pocket Double Hungs are premium quality double hung windows with extruded aluminum cladding on the exterior, like our other Ultra Series products. Yet, these pocket windows are tailored for replacement projects. It isn't necessary to remove trim – this is a pocket unit that fits into the existing sash opening.

It's your home or project, so choose your windows and doors carefully. Select the options that meet your needs. Then sit back and enjoy the view. You'll clearly see the difference quality makes.

Windows

At Kolbe, our goal is to produce a product with superior features that are built into every window and door – not added on. These quality in detail features are evident in all our units – from our most intricate custom units to our utility windows. Rest assured, we remain steadfast in our commitment to produce only the best.

To achieve that goal, we remain dedicated to the philosophies that inspired Herb & Ervin Kolbe nearly 60 years ago:

- We will always use the best materials and superior craftsmanship to produce the finest windows and doors available.
- We will strive to completely satisfy our customer.
- We will not allow manufacturing shortcuts that compromise the integrity of our design.
- We will not sacrifice either innovation or competitiveness.
- We will continue to manufacture windows and doors by harmonizing technology with the artful skill of the human eye and hand.
- The safety and health of our employees and a healthy environment will always be priorities.

Your complete and total satisfaction is our primary concern. Take a closer look at Kolbe windows & doors... and See the Difference Quality Makes.™

Windows

Why choose Pella® wood windows?

Pella offers a wide variety of shapes, styles and sizes to fit most any opening in your home. Gorgeous wood interiors not only can be finished to match your woodwork; they stay looking great with little care. And the exteriors of our wood windows are protected by our durable, low-maintenance EnduraClad® exterior that doesn't need painting. Want the best of all worlds? You can have it with Pella. And, the quality Pella has been known for since 1925 is now available in vinyl windows and doors.

Innovative products from an industry leader

Pella Corporation is an innovative leader in designing, testing, manufacturing and installing quality windows and doors for new construction, remodeling replacement applications. As a family-owned and professionally managed privately-held company, Pella is known for its 82-year history of innovation, making outstanding products, providing quality service and delivering on customer satisfaction. Headquartered in Pella, Iowa, the company is committed to incorporating new technologies, increasing productivity, and practicing environmental stewardship.

Raising standards, expanding views

Pella Corporation was founded in 1925 as the Rolcreen Company. Initially, the company was most widely known for its "disappearing" Rolcreen® window screen. Updated in its design and still popular today, the patented Rolcreen insect screen rolls out of sight when not in use. Pella patio doors and storm doors also feature Rolcreen technology.

In 1992, the company changed its name to Pella Corporation, to better reflect its entire product offering. Today the Pella® family of brands offers a full range of quality residential and commercial products in a variety of types and styles to meet virtually any design or budget.

"100 Best Companies To Work For"

Windows

Pella has been honored by *Fortune* magazine as one of “100 Best Companies to Work For” in the United States for eight consecutive years. The company is also recognized as the 2007 “Global Top Company for Leaders” in the small-to mid-sized category by Hewitt Associates, RBL Group and *Fortune* magazine, based on the exceptional training and development opportunities Pella provides.

2007 ENERGY STAR® Partner of the Year, longtime leader in environmental stewardship, Pella earned the U.S. Department of Energy’s ENERGY STAR Partner of the Year award for windows in 2007 for its leadership in manufacturing energy-efficient windows and educating consumers about them.

Pella’s commitment to environmental stewardship is firmly rooted in the company’s culture and has been since it was founded in 1925. A member of the United States Green Building Council (USGBC), Pella encourages the use of the Leadership in Energy and Environmental Design (LEED)® certification process and offers products that can contribute to certification of buildings.

Industry leader in customer satisfaction

Pella is dedicated to satisfying customers. Pella earned the 2007 J.D. Power and Associates award for “Highest in Customer Satisfaction among Window and Door Manufacturers.”

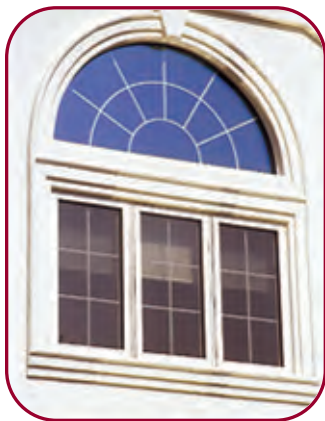

Extensive sales and service network serves customers

Early in its history, Pella built a dedicated national sales and service organization for its products, which now serves customers throughout North America and in other select countries.

Windows

Excellence In Customer Relations

Our customers are our first priority. We will do everything possible to see that you receive the products and services that are best for you.

We set priorities to assure we are spending our time wisely to get the job done efficiently and correctly the first time. Time is our most valuable asset. We strive to be professional in all of our communications and actions. We take the time necessary to do things right the first time. We pay attention to details and keep things simple. We prepare for and accept change, knowing that it is inevitable at times.

Respect And Consideration For People

We strive to maintain positive human relations with our customers, showing sensitivity and respect. We attempt to put ourselves in the other person's position and practice the "Golden Rule". We seek to recognize and benefit from the strengths that people possess. We avert problems by refraining from asking for things they are unable to provide.

Teamwork is vital. We cannot do everything ourselves. We listen carefully to what people say and strive to extract the important elements from their communications.

United Window & Door History

United Window & Door is a full service glass, windows, and doors contractor that specializes in the custom luxury home market.

United Window & Door features custom aluminum window & door products from Western Window Systems manufactured locally since 1959. Western Window Systems continues to provide a full range of glass and aluminum products for the custom residential home market that includes, multi-panel multi slides and pocket multi-slide doors, butt glazing, oversized glass, custom painted products and so much more. Western's attention to detail with their focus on state-of-the-art manufacturing of high end aluminum window and door product is what makes them #1 in the Southwest and Hawaii.

Windows

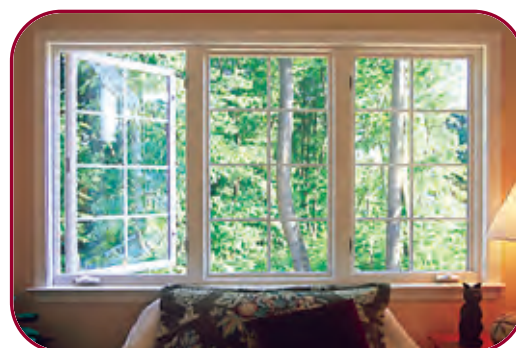

United Window & Door is proud to be one of the valley's top distributors of Milgard Vinyl & Aluminum Windows and Doors. As a full-service provider United realizes that diversity is a key to success, whether you are looking to replace your current windows and doors to gain energy efficiency or it's just time to upgrade, Milgard has the product line at a competitive price. Milgard features a "lifetime" warranty that is unmatched in the industry, combine that with local manufacturing and a commitment to service with their own in-house service team; and you'll find it very easy to say "yes" to Milgard.

If you're looking for a wood-clad alternative, United Window & Door has your answer with Kolbe & Kolbe. A family owned operation since its inception, Kolbe's mission is to produce only the best with products that meet or exceed Energy Star Ratings. No matter what you're in the market for, Kolbe & Kolbe will work hard to satisfy your needs, from basic utility windows to the most intricate custom units. Kolbe's commitment is to satisfy the customer.

United Window & Door is constantly striving to bring you products that fit your needs; you'll find fiberglass entry systems and interior doors from Therma-Tru & Jeldwen, along with glass block windows with Low E coatings from US Glass Block, and so much more.

United Window & Door maintains a full staff of installers and glazing trucks, with a focus on customer service, cleanliness, safety and continued training. United's service department can handle any form of glass replacement, single hung balancer replacement, French door adjustment, sliding glass door roller replacement and lock adjustments. When it comes to custom residential windows and doors, no job is too big or small for United Window & Door.

The principals of United Window & Door bring to you over forty-five years of combined experience in the custom window and door arena.

Windows

MW Windows & Doors, a brand of MW Manufacturers Inc., with corporate headquarters in Rocky Mount, VA, is a leading manufacturer of window and door products for the residential construction industry. Founded in 1939, MW was one of the first window companies in the country to build a window and frame together as a single unit ready for installation into a rough opening.

It All Starts With Selection, Service and Value

"Going the extra mile" has long been a commonly held attitude for MW Windows & Doors and we pride ourselves on our Selection, Service and Value.

Selection

MW offers a comprehensive line of vinyl, wood, wood-clad, composite, impact and aluminum windows and patio doors. Whether it's material, size, shape, options, code performance or price point, MW has a window and patio door option to fit every specific market need.

Service

For more than 60 years, MW has provided customers with the best service possible. Experienced and knowledgeable sales representatives and a dedicated service team assist with orders from quote to delivery and post sale.

Value

MW understands that the definition of Value is unique to each of its customers. MW takes the time to understand its customers' business, their objectives and their local markets. MW applies this knowledge by working directly with customers to develop the best window and door solutions to maximize value for them and their customers.

Doors

At Fox we don't stock any doors; we offer contractors and homeowners warehouse and Andersen van load pricing. Products out of warehouse arrive within a few days. Those items that need to be made arrive in about three weeks.

Doors

Your storm door should be a reflection of you.

With so many different features and colors to choose from, there isn't a home or personality we can't match. We invite you to "try on" the perfect Larson Storm Door for your house. First, select a home style that's similar to yours, then choose from our vast selection of storm doors...matching door styles and colors to home styles and colors.

Your home's entryway should say "Welcome" in your own unique way. The shine of a solid brass handle, the brilliance and glimmer of sunlight through precision beveled glass panes or the luster of brass inlay to complement the accents around your door. Coordinating brass-tone expanders, color-matched closing mechanisms, and concealed exterior screws add a smooth, finished appearance.

At Larson, we build craftsmanship into every detail of our doors. Inside and out, Larson doors combine the best qualities of remarkably durable construction and exceptional fit and finish. When you buy a Larson storm door, you're getting an addition to your home that's as durable as it is good-looking. And it's been that way for more than 50 years.

Lifetime Warranty

That's why we stand behind our doors with one of the best warranty programs available. Many Larson Storm Doors are backed by a Limited Lifetime Warranty. It's just what you expect from Larson, America's #1 Selling Storm Door.

Built around you.™

Doors

Marvin Entry Doors

Marvin Entry Doors bring together old world craftsmanship and modern millwork manufacturing—enabling you to customize your entryway to match your home and lifestyle.

Marvin Entry Doors are intricately handcrafted. Skilled craftsmen in San Pedro Sula, Honduras execute designs based on the imagination or an extensive offering of vintage and popular designs. The grain and color of the wood is carefully matched for a furniture-grade look. The stile and top rail construction is solid wood engineered and has been enhanced to accommodate the concealed multi-point locking system.

Available in Honduran Mahogany, Honduran Cedar, White Oak, Walnut and Cherry, Marvin Entry Doors come in seven architectural styles:

Artistic

Hand-carved appliques, embossing and engraving showcase logos, family crests and other unique details.

Classic

Soft curves and elaborate glass designs create a timeless entry that can be enhanced with hand-beveled leaded art glass with patina, zinc or brass coming.

Traditional

Simply elegant. Clean, uncluttered lines are blended with the warmth of solid wood.

Craftsman

Inspired by the Arts & Crafts movement, these doors feature unique mouldings, lines and glass inserts.

Old World

Hand-forged solid iron grilles and accessories convey the essence of the Italian countryside.

Luminary

A variety of clear, opaque and beveled glass options provide an endless array of styles.

Rustic

Crafted to complement the rugged allure of a home in a natural setting, various options are available including speakeasy doors and distressing.

Doors

Marvin Entry Door Options

- 7 Architectural Styles
- 5 Specialty Wood Species
- Available in 5 finishes or primed
- Unlimited custom carving capabilities
- Decorative and patterned glass
- Side lites, transoms and roundtops
- Several hinge finishes and finial tops
- Adjustable aluminum sills or solid-wood thresholds
- Factory installed concealed multi-point locking system available in all door panel configurations

Doors

BW I® Roots

For over 20 years, Bridgewater Wholesalers, Inc.® (BW I)® has supplied specialty millwork to independent retail establishments, bringing builders and homeowners expertise and personal service.

Headquartered in Branchburg, New Jersey, BW I® has expanded rapidly over the past several years, opening three new facilities to service our customers in nine states. Our geographic expansion has allowed us to provide better service to our growing customer base from Connecticut to North Carolina.

BW I® Today

Today, BW I® is a premier provider of fine millwork across the eastern seaboard. With over 400 employees, multiple locations, and a large fleet of vehicles, we are able to offer shorter lead times and a larger inventory than ever before. As a company, we are known for our consistent quality, exceptional customer service, and highly professional sales and support staff. At BW I®, our mission is to become the leading provider of fine millwork to independent lumber retailers offering the widest variety of quality products. Whatever our customer is looking for, we strive to deliver.

BW I®'s Future

We believe this strong commitment to our customers will continue to build our reputation as a leader in the millwork industry and lead to our future growth across the region. We are constantly monitoring industry and market trends and adjusting our inventory and services to meet these demands.

Doors

Masonite®

Bridgewater Wholesalers, Inc.® is a proud distributor of Masonite® exterior doors. Fiberglass entry doors feature high-performance fiberglass facings and square-edge construction for maximum performance and authentic wood door appearance. Available in a wide range of wood finishes and glass configurations, there's a style to meet everyone's taste.

Masonite is one of the world's leading manufacturers of interior doors and entry door systems. Throughout the company's 80 year history, Masonite has maintained its focus on leading-edge product innovation, manufacturing excellence and superior customer service.

Masonite is constantly expanding its diverse line of interior and exterior doors to meet any design or budget. We are committed to offering a comprehensive line of beautiful and durable doors that add value to any home. For the finishing touch, Masonite offers a full line of patio doors available with a wide variety of options and glass designs.

Builders, remodelers, architects and homeowners rely on Masonite products to set their projects apart from the pack.

Masonite can help you add value to your home by enhancing your entryway or accenting your interiors. For building, renovating or redecorating, Masonite products are certain to beautify and accentuate a wide array of architectural home styles.

Curb appeal is a key part of a home's value in today's competitive real estate markets. Entry systems are one of the most cost-effective ways to add value to the exterior of a home.

Door design and finish contribute to the overall style and beauty of a room.

Doors

TRÜSTILE®

TruStile®

When it comes to custom homes, the right architectural elements make the difference. That's why Bridgewater Wholesalers, Inc.® is proud to be a major East Coast distributor of TruStile doors. TruStile® doors are available in over 350 styles offering unmatched style selection. If you can design it, TruStile® can build it.

Open the door to design

As you move through every room in your home, doors should complement your unique architecture and individual style – much like furnishings and décor. Whether you are building, restoring or redecorating your home, TruStile's fine, architectural doors offer enduring beauty and performance. Available in solid MDF, any stain-grade wood species and unique TruClad® metal finishes, each TruStile door is made to your exact specifications and comes with a lifetime guarantee.

TruStile difference

TruStile takes pride in being a design and product innovator. Among other things, TruStile pioneered the use of MDF (medium density fiberboard) as a preferred material for painted door applications.

Authentic Designs™

Not sure what type of doors will complement your home's architectural style? Authentic Designs™ provides door recommendations for 12 popular architectural styles, from Art Deco to Victorian.

Milliken Millwork, Inc. 
WHOLESALE DISTRIBUTORS

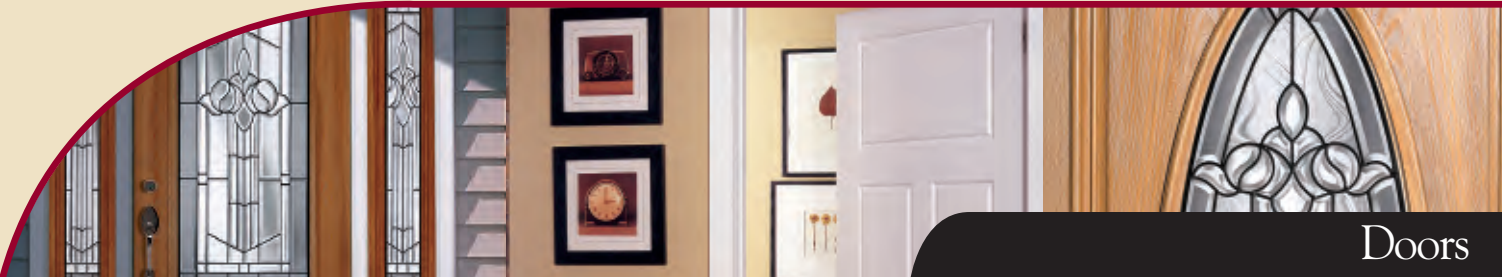

JELD-WEN
WINDOWS & DOORS

Milliken Millwork, Inc. has supplied midwest home centers and building supply dealers with windows, doors and related millwork products for over 50 years. We are proud of our continuous family ownership and the tradition that comes with it. When Lloyd and Jane Milliken, with their son Tom, first opened Milliken Millwork, Inc. in 1953, they instilled a work ethic and customer oriented business plan that continues today. The third generation family members are actively involved today managing our position as an industry leader.

With four locations servicing all or portions of thirteen Midwest and Mid-Atlantic states, Milliken's market area stretches from Minnesota to the Atlantic shore. Our product lines are available through most major building supply dealers and home centers within that geography.

Our products are stored, assembled and staged in over 600,000 square feet of climate controlled warehouses. Strict quality control standards are followed so we deliver maximum value to the end user. With one of the largest and most diverse inventories in the country, Milliken offers product opportunities that are second to none.

Good products deserve good service. That is where over 500 Milliken employees excel. Customer focused and dedicated to doing it right the first time, Milliken employees are responsive, reliable and informed. It is our people that makes the difference.

Doors

As our industry evolves, so does Milliken Millwork. One of our primary goals is to keep our customers strong in a changing environment. We strive to be the most reliable, the most responsive and the most innovative distributor in the marketplace. We look forward to the next fifty years of service to this dynamic industry.

Doors

REEB

THERMA-TRU
DOORS

Whether you want an entryway that is traditional, contemporary, or rustic, our selections give you the warmth and beauty you are looking for, with the comfort and security of an insulated door. Create your own custom front door combination with sidelites, transoms, or both. Choose from Thermo-Tru's extensive collection of decorative glass patterns. From streaming light to privacy, we have a selection that best fits your needs.

Simpson®

At Simpson, we believe the doors in your home are more than just building materials. They become part of the backdrop for the memories of your life. They add color and texture to the everyday stories that unfold within the walls of your home. That's why we build doors that outlast changing styles. Doors that stand up to years of use. In short, doors you can live with for a long, long time.

FOX
Lumber & Building Materials

JELD-WEN® wood exterior doors are designed to be inviting. With our IWP® Custom wood exterior doors, you can request your own design for a truly unique creation. Or select JELD-WEN Premium wood exterior doors, which come in a large range of wood species. Both collections feature architecturally inspired designs.

One look at our beaded panel doors and you can tell handcrafted quality workmanship is the hallmark of Rogue Valley Door. Rogue Valley beaded panel doors incorporate such details as ornate beaded or true v-groove panels, highlighting the natural luster of these fine wood doors and adding style and dimension to your home's interior design.

Decking & Railing

Trex

DECKING & RAILING

What is Trex®?

Trex decking and railing products are made from a unique combination of reclaimed wood and plastic, giving you the best qualities of both materials. The plastic shields the wood from moisture and insect damage, so there's no rotting or splintering. The wood protects the plastic from UV damage and gives your deck a solid, natural feel. It looks great year after year. And because there is no need to spend hours staining or repairing, the enjoyment of a Trex deck is truly timeless.

Unlike wood surfaces, Trex

- will not rot or deteriorate due to harsh weather
- is available in various finishes – smooth, wood grain or tropical hardwood
- is available in six color options to suit any home style
- is splinter-free
- contains no toxic chemicals or preservatives
- resists moisture, insects and sunlight, making Trex decking the perfect choice for pools, hot tubs and spas
- has excellent traction, even when wet

As an added benefit of your Trex deck, you are helping the environment because Trex is made primarily with recycled plastic grocery bags, reclaimed pallet wrap and waste wood.

Why Choose Trex?

There are many imitators. But there's only one Trex. We specially designed Trex to deliver a natural look and comfortable feel that no composite product can match. All with the widest range of distinctive colors, textures and styles to choose from.

Trex – the leading brand

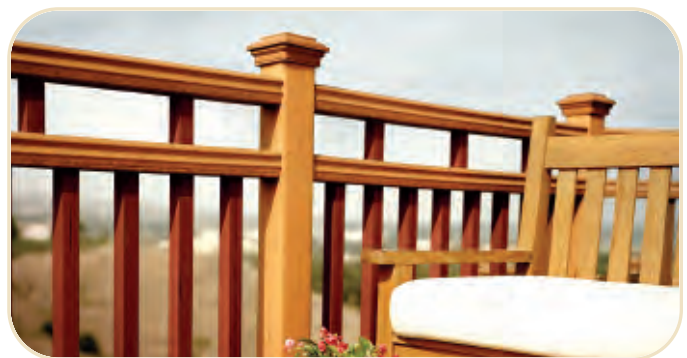

Trex Company created the category of composite decking materials. And in doing so, we have more experience in creating inspiring dream decks and outdoor living space than anyone else in the business. In fact, over one million homeowners across the country own a Trex deck.

Trusted by the pros

When architects and builders choose a decking supplier to help build their visions with confidence, more of them turn to Trex than any other brand. Our wide network of dealers and certified TrexPro® contractors makes it easy to turn your plans for a dream deck into reality.

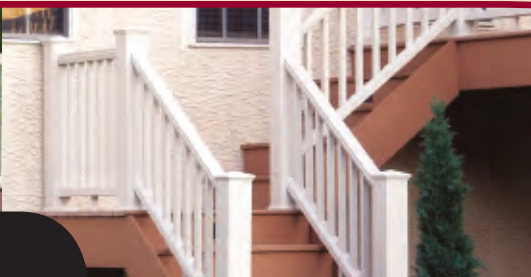

A better lifetime value

Trex has the longest record of proven performance. Because it requires so little maintenance, Trex makes for a better value over the life of your deck purchase. Trex offers a 25-year limited residential warranty on all our products. Trex will never rot or warp. And you'll never have to sand or stain Trex. This means you can enjoy your Trex deck with fewer worries than with any other materials for years to come. We've taken the rich beauty of wood and left behind the splinters.

Trex

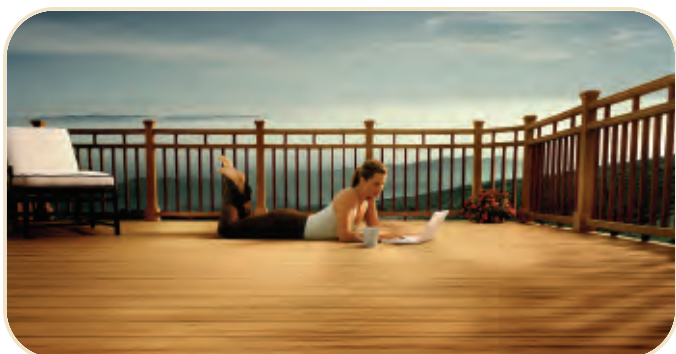

DECKING & RAILING

Decking & Railing

Trex®

DECKING & RAILING

Take off your shoes and come outside. Life just feels better when you are on Trex®. We designed Trex decking to fit perfectly in your backyard and your lifestyle. Nothing else even comes close.

Trex Decking:

- Offers the most natural look and feel of wood without the maintenance – patterns range from subtle to bold to tropical
- Will not splinter, rot, warp or crack
- Feels soft and comfortable to the touch
- Available in a variety of colors and profiles to complement any look
- Easy to work with and allows for design flexibility
- Is an investment that provides a value over time
- Affordably-priced to meet any project needs
- Environmentally friendly
- Backed by a 25-year Limited Residential Warranty

Railing Systems

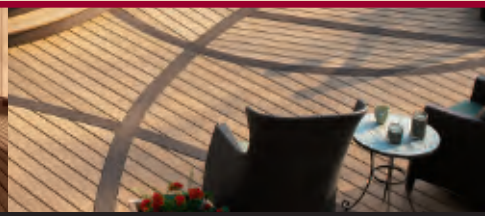

Trex® is an excellent choice, not only for the decking surface, but also for the railing system. A Trex railing system expands your deck design capabilities by dividing space in spectacular ways utilizing a wide array of colors, textures and shapes. Trex railings are made with the same enduring quality and serve as an elegant touch to your deck. Trex railings eliminate splinters and give the deck a finished appearance. Trex has all the components you need to complete the deck and railing of your dreams.

Trex Artisan Series Railing reflects a thoughtful design with a crisp, finished appearance.

Trex Designer Series Railing gives a distinctive look without the cutting or routing normally required.

The Traditional Railing is designed for those who prefer the traditional railing system normally associated with wood decks.

Decking & Railing

Warranty Information

Trex Company offers one of the industry's leading warranty coverage for both residential and commercial decking and railing products. Trex warrants that, under normal use and service conditions, Trex products won't:

- Check
- Splinter
- Rot
- Split
- Suffer structural damage from insects!

25-Year Limited Residential Warranty

Trex offers homeowners peace of mind with our 25-Year Limited Residential Warranty. Our 13-year proven track record of manufacturing durable, high-quality products has made us the #1 national brand. Under our warranty, Trex guarantees that our products will not sustain damage from insects, check, rot, splinter or split under normal use.

Products Purchased after January 1, 2005

- 25-Year Decking & Railing Limited Residential Warranty
- 25-Year Fencing Limited Residential Warranty

Products Purchased before January 1, 2005

- 10-Year Decking & Railing Limited Residential Warranty

5-Year Limited Commercial Warranty

Trex products are found in numerous outdoor spaces, including high-traffic public-use areas where the climate and people are constantly testing their durability. Trex offers a 5-Year Limited Commercial Warranty that guarantees that our products will not sustain damage from insects, check, rot, splinter or split under normal use.

Trex

DECKING & RAILING

Decking & Railing

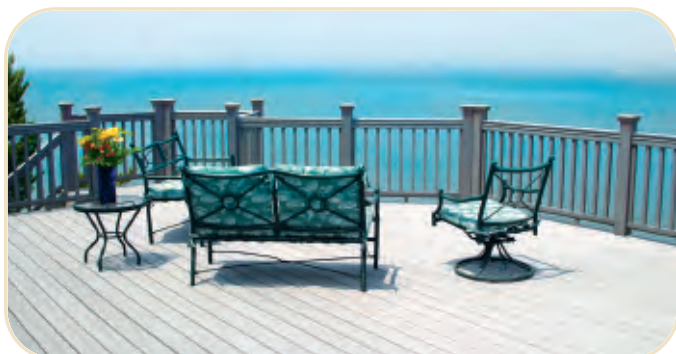

Why TimberTech®?

Why stain and seal every year? Why spend time and money maintaining decks that weather, warp, rot and require expensive, time-consuming repairs?

TimberTech pioneered our patented process of combining the highest quality reclaimed wood fibers with pure plastic resins to create skid-free, splinter-free composite decking with superior strength and legendary durability. The result is a more consistent, more natural-looking, higher quality decking material that consistently outperforms wood or composites that use recycled materials.

Our decks add beauty to homes, businesses and resorts. What's more, TimberTech composite decking is low maintenance. It's also heat and fade resistant, safe, durable, and can even increase the value of your home.

Life is full of high-maintenance concerns – but your deck shouldn't be one of them.

Decking & Railing

With TimberTech You Build Green...

TimberTech composite decking and railing products offer an attractive, low-maintenance, extremely durable and cost-effective alternative to popular and often chemically treated woods like redwood and cedar.

And, because TimberTech products will not splinter, warp or fade the way wood does, they dramatically reduce the wasteful cycle of repair and replacement – and eliminate the frequent application of environmentally harmful paint, sealers and stains.

TimberTech composite products are manufactured with reclaimed wood materials that would otherwise go into landfills. TimberTech recycles water during the manufacturing process.

Unlike wood, TimberTech products are a one-time purchase for most homeowners – with a 25-year residential warranty. TimberTech composite wood products do not require painting, staining or sealing.

Decking & Railing

Beautiful Ideas Begin Here.

Let your imagination wander. Explore other decks, other stories, other ideas we've helped bring to life. It's the first step to a beautiful ending.

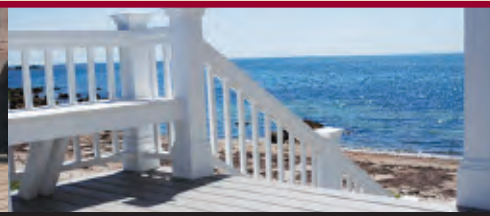

All kinds of environments can be enhanced with EverGrain® Decking. Whether you're looking for an incredible new deck, porch, swimming pool deck, dock or walkway, it's an addition that will get noticed. Just take a look at these photos to see what others have created. Or take a look over this checklist for tips on planning and designing the ultimate addition.

Of course, this decision is about more than looks. You want something that will last for years of enjoyment. So we offer a 25-year limited warranty on all EverGrain products. This protects your investment against rotting, splintering, splitting and termite damage. And that's just the beginning of the list of reasons to choose EverGrain. Here are a few more:

- Many natural colors
- Low maintenance
- Professional finish skirting to complement your deck
- Slip-resistance that exceeds ADA accessibility guidelines
- Easy installation
- Matching railing systems
- Contains recycled material

Decking & Railing

AZEK® Deck is the next generation of decking. Now, wood and composite decking are no longer your only choices.

AZEK® Deck, made of cellular pvc, is engineered with our proprietary Procell™ Technology, and virtually eliminates all the shortfalls associated with today's decking materials.

Truly Low Maintenance

Unlike other decks, AZEK® Decks require little maintenance to retain their beauty. An occasional soap-and-water cleaning keeps them looking new. AZEK® Decks are mold resistant, since the cellular pvc formulation doesn't contain wood fibers which promote mold and mildew growth.

Superior Stain Resistance

Our cellular PVC formulation resists natural and man-made stains such as wet leaves, fruit punch and the ketchup from your burger.

Superior Scratch Resistance

Our strong, dense surface resists scratches from screws, tools and other gear during installation, so you can work with less worry. After installation, AZEK® Deck resists damage from everyday things like lawn furniture, dog claws and general traffic wear patterns.

Solid Workability & Beauty

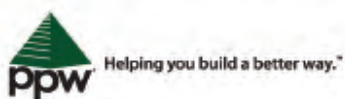

AZEK® Deck has the workability of wood and you will love the lasting beauty of your AZEK® Deck.

With WeatherBest® decking, you can be confident that you are installing a high quality addition to your home.

Decking & Railing

Especially for Homeowners and Do-It-Yourselfers

The day you purchased your home, you made one of the biggest – and smartest – investments of your life. And if you add a beautiful, well-made deck to your home, or renovate an existing deck, you increase the value of your investment substantially.

A deck creates unlimited opportunities for relaxation and fun for your family and friends. A deck extends the living space of your home. That's why we say, "Any Time is Deck Time™."

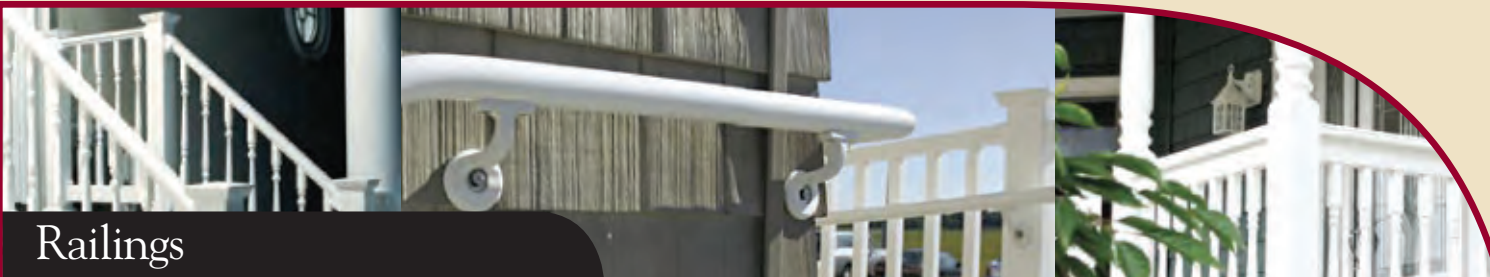

So when it comes time to add or renovate a deck, whether you hire a contractor or do it yourself, make sure you use innovative, award-winning EB-TY® Hidden Deck Fasteners™.

EB-TY deck fasteners eliminate unsightly surface scars, such as splinters, holes, or puddle areas to mar the beauty and safety of your deck. You won't have to worry about nails popping up or screws tearing bare feet. And you won't have rows and rows of holes in your deck surface because EB-TY Hidden Deck Fasteners are virtually invisible – above or below the deck. The dark color of the fasteners blends with the shadow of the joints.

Our fasteners are the most reliable, long-lasting fasteners on the market. They are manufactured in the United States and made of ultra-violet resistant polypropylene. They can't rust, and they're guaranteed to last 100 years with normal use.

EB-TY Hidden Deck Fasteners save time and money. All the installation is done from the top surface, so you can have a deck as close to the ground as you want.

Railings

The endurance family of maintenance-free building products is our national best seller, thanks to sound engineering that enables easy and safe installations. Our maintenance-free systems are manufactured using the highest quality materials for each and every product. Our extensive endurance product line improves the appearance of any home or commercial space. We offer our products through building product distributors nationwide in an array of colors, styles, options and dimensions to meet all your performance and building requirements. Our commitment to making the safest, highest quality products available today makes it easy for you to choose Endurance.

White

Earth

Sand

ORIGINAL RAIL™ is the cornerstone of the Endurance product line. The complete system of railing kits is coupled with a variety of accessory brackets that allow installation to any surface at any angle. Simple form and dependable function unite these rail designs in order to maintain safety without sacrificing the elegant presentation of your home or commercial space. No detail is too small when beautiful presentation is the goal; and we've considered them all, down to the screw head covers. The vinyl extrusions with aluminum stiffeners add strength and durability to the top and bottom rails, while the unique locking pin design provides secure, invisible attachment of the aluminum reinforcements to the building's structure inside the mounting brackets.

Railings

DECK RAIL™ is the ultimate combination of superior design and beauty. Safe and strong, DECK RAIL™ sets a new standard in the vinyl railing industry. The innovative wide cap design is an optional decorative feature that covers and beautifies. It also serves an active part of your deck while barbecuing or relaxing by providing a surface to place plates and drinks. Made from a durable composite material that has the look of freshly-painted wood, the cap was designed to ensure a continuous clean line on top of the intermediate newel posts. The accessory bracket kits offer flexibility to your unique railing installation by providing a solution when mounting to round columns, on 45° angles, and angles from 0°-44°.

CROSSOVER PRODUCT™ includes Post Wraps, Post Sleeves, Gates, Caps and Trim Rings. All products in this line are compatible with Deck Rail and Original Rail, and made from maintenance-free, virgin vinyl. Installing a single-wall post wrap requires only two steps: cutting to fit, and snapping the pieces into place. The post sleeve slides over an existing wood post, new construction post, or the Endurance Structural Post. The decorative post caps and trim rings provide a finished look to your installation. Our complete line of gate kits add privacy and security to your home.

PORCH & NEWEL POST™ designs capture the elegant style of a turned, painted wood post without the maintenance. Underneath the classic design of the porch post is a load-bearing aluminum column with a capacity of 2500 lbs., 5000 lbs., or 8500 lbs. Hurricane Lock™ post bases prevent wind uplift and eliminate roof jacking during installation. Four-piece trim collars install easily to finish the job.

Structural Newel Posts are available with flush-mount bases to bolt down to any surface or in a thru-the-deck style for attachment to any structural member. Thru-the-deck posts can also be used in commercial applications where core mounting is desirable.

Railings

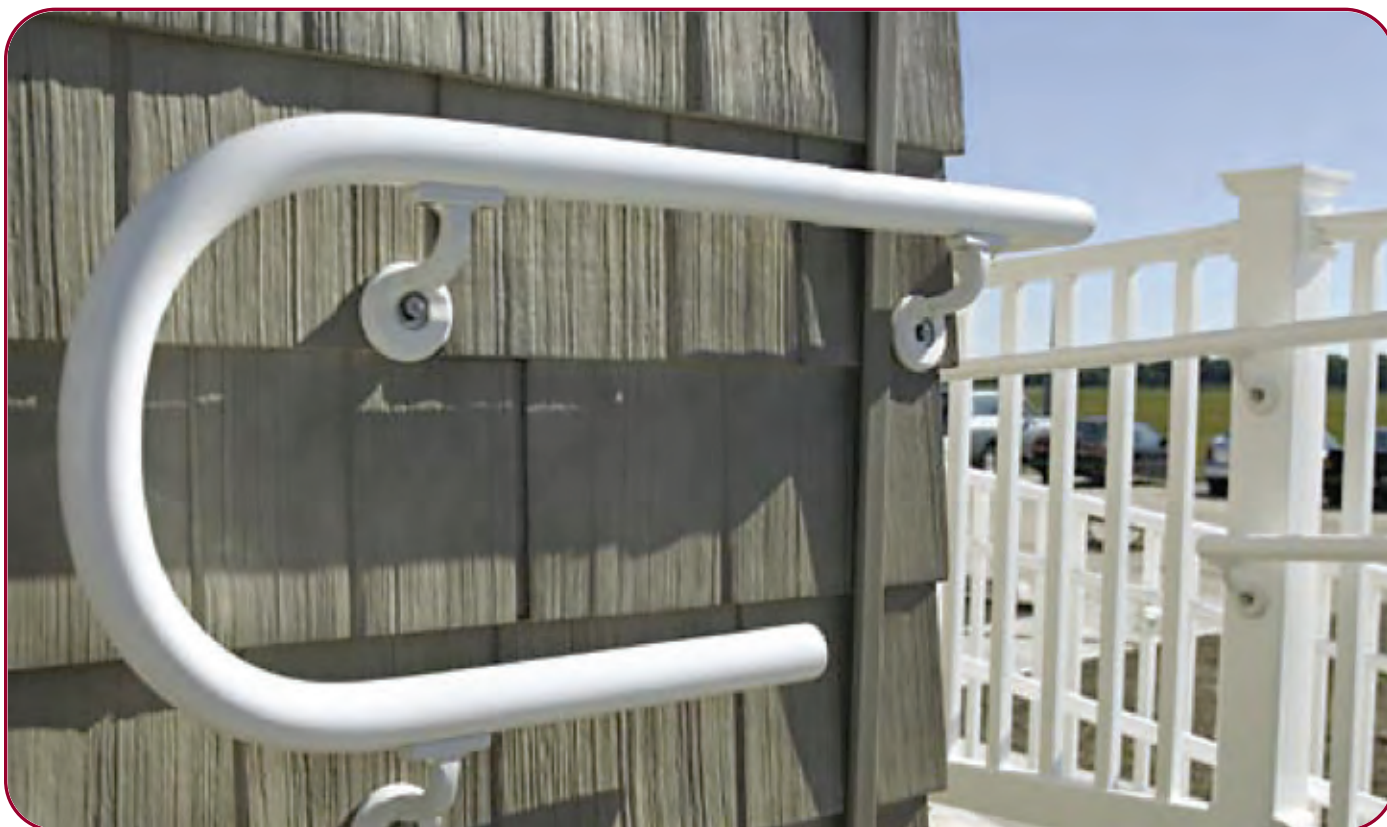

HAND RAIL™ is a highly acclaimed product that provides added safety to any installation by providing an uninterrupted graspable surface for the entire run of ramp or stair.

The key to HAND RAIL™'s success is its fully adjustable internal joiner. The joiner can accommodate any angle from 0° to 90°. The rail is 1½" in diameter and can be configured to meet ADA graspability requirements. The simplicity of installation compared to pre-bent fittings is unparalleled, and this system can be mounted to wood, vinyl, masonry or metal.

White

Decking & Railing

Diamond Decking

Diamond Decking reflects the warmth and elegance of a fine hardwood floor. It combines beauty and natural durability to make Diamond Decking the perfect selection for your outdoor living area.

Gazebos, stairs, rail systems, planters, porch decking, pool and spa surrounds, landscape elements, outdoor furniture, fencing, exterior balconies, ramps, docks, bridges, and walkways, when crafted in Diamond Decking, take on a more distinctive appearance.

Other Woods

Diamond Hardwood's extensive supply network enables us to offer a variety of other species. To learn more about these alternatives and discuss your specific needs, please contact us.

- Lasting beauty increases the long term value of projects
- Slip resistant properties improve safety on decks, docks, and boardwalks
- Environmentally friendly Diamond Decking is 100% natural
- Dense cell structure is extremely resistant to insects, moisture, and fire
- Available in both standard and custom dimensions
- Extraordinary strength and hardness permits vehicular traffic design options
- Exceptional durability provides many extra years of enjoyment as evidenced by our transferable 25 year warranty.
- Highest fire rating A1 by NFPA
- Rich russet tone may be preserved by applying an oil with UV Blocker; left natural, it will age to a brilliant silver patina

Beautiful True Brazilian Ipe Rail Systems

Diamond Decking rail systems are priced surprisingly competitively with composite systems and less exotic woods. The heart of the system is the beautifully molded top rail. Two sizes systems are available, the 2x6 and the 2x4.

The Rail System is composed of 4 parts:

- The Molded Top Rail
- A Sub Rail (Fillet)
- The Bottom Rail
- Balusters

Decking & Railing

We stock:

- Top Rails, Sub Rails and Bottom Rails in 8'; 12'; and 16'
- 2x2 Balusters in 36"; 84"; and 96"

Holbrook also stocks dimension, timbers and other products so you can sell the whole job.

- 2x4 and 2x6 S4S R/L
- 4x4 S4S in 8' and 10'
- Anchor End Seal – prevents checking in quarts

Diamond Decking's custom milled rail system and trim moulding provide the rich architectural details associated with fine interiors.

The world's finest, most attractive hardwoods for residential, commercial and marine projects.

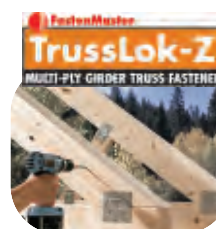

FastenMaster Innovation

The innovative fasteners from FastenMaster include the TrapEase composite deck screw, IQ Hidden Deck fastener, LedgerLok ledger fastener, TimberLok, TrussLok engineered wood fastener and more.

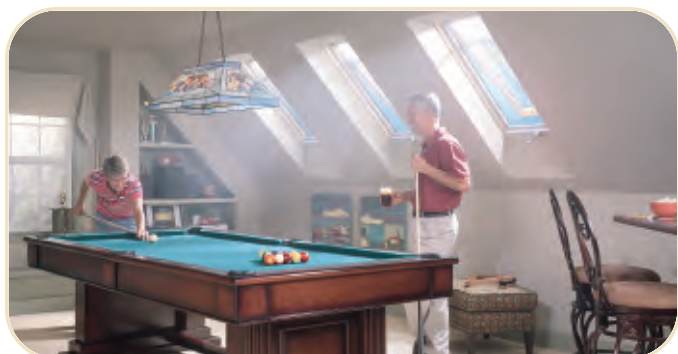

Just Clip & Flip.

- Above the deck installation
- First and last board design
- No special tools needed
- Extremely strong holding power
- Consistent board to board gapping
- Engineered for composite and hardwood decks
- Free instructional DVD in every package
- Can be used with perpendicular to joist and angled deck designs

Skylights

Quality, development and improvement are important keywords at VELUX®. This is especially true in our test department, where products are continuously exposed to all kinds of tests as an integral part of our company's efforts to develop and improve our products.

Our VELUX test facilities ensure that new products comply with regulations and market demands to technical performance. And they ensure that our products are able to withstand all the different climatic conditions that VELUX products are exposed to in the markets where they are sold.

Our test procedures include such aspects as air and water tightness in a test chamber and a weather simulator, mechanical tests, durability tests, U-value tests, sound insulation tests and visual inspection of the surface quality. These tests simulate the various weather conditions that will affect VELUX windows in the different climates where they are installed; for instance, heavy snowload, heat and cold, wind and rain and many years of use, including 25,000 opening and closing operations.

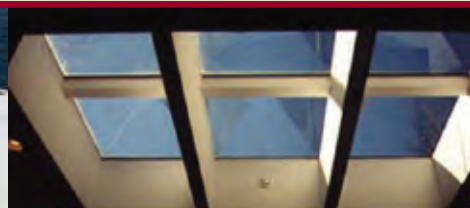

Our thorough internal tests are then followed by tests and approvals by internationally accredited laboratories to ensure that any new products have been tested in every detail before they are installed in peoples' homes.

At our factories, each step of the process is carefully checked, including inspection of received components to ensure that they meet our specifications, for instance through continuous inspection of part components.

Random checks are made to continually test the product's technical performance, including air and water tightness and the strength of corner sections.

And the finished products are tested to ensure that they meet the extensive functional demands and visual quality specified by VELUX.

Skylights

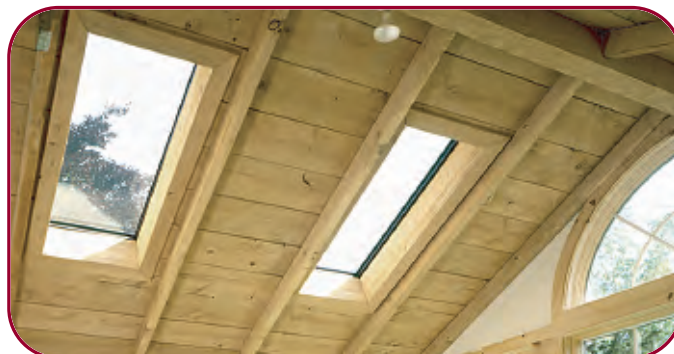

Dome'l residential skylights are manufactured from durable, heavy-gauge, thermally insulated aluminum extrusions that are welded together to form a seamless skylight. Unlike typical skylights that use simple fasteners and fragile materials, Dome'l uses solid welds, energy efficient glazing and durable materials to withstand all weather conditions.

From the "Insta-Flash" self-flashed, insulated glass skylight design (no flashing kit!) to the curb mount acrylic dome design for flat roofs, the innovative designs save valuable time and make installation effortless. That's why Dome'l offers the boldest warranties in the industry.

If a standard skylight does not meet your needs, Dome'l custom fabricates to your exact specifications. We can make special sizes and shapes or just match an existing opening to save you time.

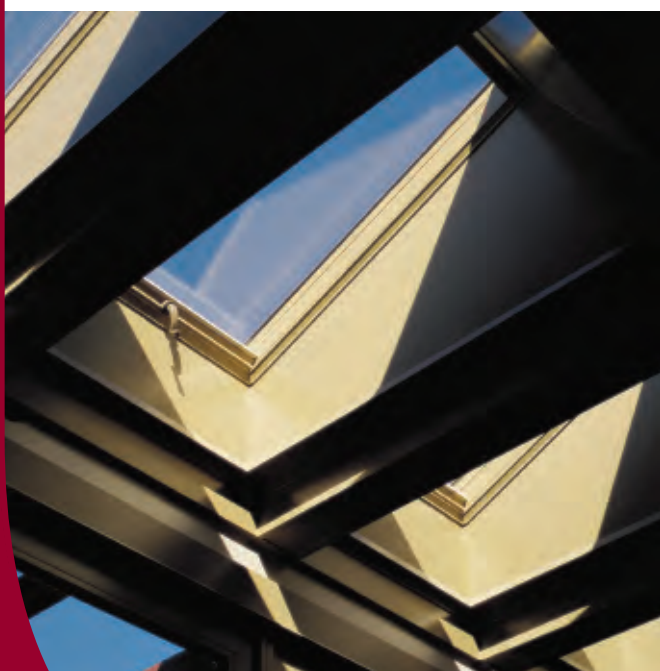

Whether you prefer the traditional approach to operating your skylight with a telescopic pole or a more modern method of operation with a remote control from the convenience of your favorite chair, Dome'l has the perfect accessory to make your life a little easier.

Roof Windows and Skylights

Stationary Roof Windows • Venting Roof Windows • Skylights

Andersen® roof windows and skylights are full of overhead options. Whether the choice is venting or non-venting, a natural wood interior or a drywall return, these units combine beauty with unquestioned performance. These are real windows for the roof.

Electric operators (left) make it easy to open and close roof windows that are out of reach. The built-in rain sensor automatically closes the units in the event of a storm.

The standard color is Terratone®. White, Sandtone and Forest Green colors are also available for both the units and the flashing. Patterned glass options are available.

Conventional Perma-Clean® insect screens cover the entire length and width of the window opening. Available with a stone-finish frame.

MOULDING & MILLWORK

Established in 1926, as a family owned and operated company, Moulding & Millwork has become one of the largest suppliers of wood mouldings in North America, including pine, oak, poplar, hemlock, mahogany, maple, cedar and MDF mouldings. With nine modern manufacturing facilities and thirty-seven sales and warehouse facilities, we are able to satisfy regional product needs and provide superior local market service.

Moulding & Millwork's vast global supply network includes manufacturing plants through our parent company, Sauder Industries Ltd., as well as leading vertically integrated moulding producers from around the world. Deep inventories of quality moulding products, combined with specialized knowledge of customer needs, buying power and financial strength, yield near perfect fill rates on a next day ship basis. Our strength in production and manufacturing ensures short lead times and the flexibility to respond quickly to customer needs, contributing to the growth of our customers' businesses!

Moulding & Millwork boasts some of the most advanced manufacturing equipment and processes available, including an in-house CAD capability that allows us to design consistently high quality profiles and products, with minimum waste. We are proud to offer our customers a selection of more than 5,000 moulding profiles.

EX-CEL[®]
PVC TRIM

The Alternative to Wood that Lasts a Lifetime

Ex-cel[®] PVC Panels and Trim provide the look and feel of wood, with the durability of PVC. It cuts, routes and handles like a premium wood product, without ever splitting, rotting, warping or swelling. Approved for below grade and suitable for ground contact, it is insect and moisture resistant and provides minimal expansion and contraction. With cellular PVC technology and a UV resistant closed cell structure, Ex-cel PVC Trim is ideal for use on fascias, door and window trim, rake and corner trim, column wraps, porch railing, siding – board & batten and soffits – beaded plank.

It carries a lifetime product warranty and although it doesn't require painting for protection, is paintable for all your custom decorating needs. Wood and engineered trims can't stand up to Ex-cel PVC Trim's lasting power. In addition to the properties listed below and inside, consider Ex-cel PVC Trim's fire resistance. Wood typically falls below the oxygen index value of 28% that is considered self-extinguishing.

- Never absorbs water
- Resists rot
- Is Insect proof
- Withstands direct contact with moisture
- Is approved for below grade and/or ground contact
- No pre-drilling required to avoid splitting when edge nailing

Over 65 Years Of Quality Product Manufacturing And Customer Service

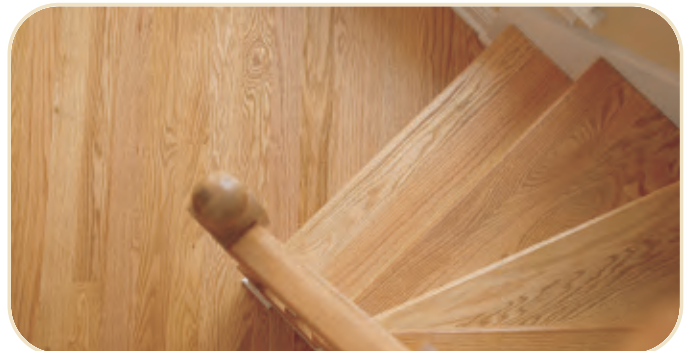

Weaber, Inc. has become one of the nation's leading hardwood lumber manufacturers with one simple principle: Meet and exceed our customer's requirements of quality and service. It is our intent to extend our commitment to excellence in manufacturing and service for generations to come.

Every step of our operation is geared to your needs as our customer. Our foresters are committed to the conservation and management of our rich, and renewable, Appalachian timber resource. They work hard to ensure a lumber supply that we can depend on in the future.

During the lumber manufacturing process our many qualified employees adhere to a strict code of standards to ensure a high quality product and service. Our quality control is evident in all phases of the operation, and our service doesn't end with the sale.

Our continual change allows us to service our customers with rough or finished lumber, S4S boards, moulding and cut-to-size products. Along with these products, we are able to service our customers with small quantities through our distribution center and with multiple truckloads from the mill. We service customers locally, throughout North and Central America, as well as worldwide.

You will find that Weaber, Inc. is able to meet the needs of your company. Give our knowledgeable sales and forestry personnel the opportunity to serve you, and we will work hard to earn and keep your trust.

Exotic Hardwoods & Domestic Lumber

'M&P GOLD BRAND'

Where quality and service meet

"Green" Your Home with Natural, Sustainable American Hardwoods

Looking for an earth-friendly way to add beauty and warmth to the home? Green, sustainable American hardwood floors, cabinetry and trim add natural elegance to today's interiors.

What are American Hardwoods?

Hardwoods are deciduous trees that have broad leaves, produce a fruit or nut and generally go dormant in the winter. America's forests grow hundreds of varieties of hardwood trees that thrive in this country's temperate climates. These varieties, or species, include oak, ash, cherry, maple and poplar.

Softwoods are conifers, evergreen and cone-bearing trees. Widely available U.S. softwoods include cedar, fir, hemlock, pine, redwood and spruce. In a home, softwoods primarily are used as structural lumber such as 2x4s and 2x6s, with limited decorative applications.

All the commercially available U.S. hardwoods are crafted into furniture, cabinetry, woodwork and built-ins. It's simply a matter of taste, preference and availability.

Certain hardwood species aren't recommended for flooring because they're not hard enough to withstand heavy wear and tear.

We Have Many Quality Hardwoods to choose

White Oak***

Quarter Sawn White Oak

The sapwood is light-colored and the heartwood is light to dark brown. White oak is mostly straight-grained with a medium to coarse texture, with longer rays than red oak. White oak, therefore, has more figure.

Working Properties: White oak machines well, nails and screws well although pre-boring is advised. Since it reacts with iron, galvanized nail are recommend. Its adhesive properties are variable, but it stains to a good finish. Can be stained with a wide range of finish tones. The wood dries slowly.

Spanish Cedar

Spanish Cedar is widely used as a construction timber in South America, as well as for furniture and paneling. But in North America, Spanish Cedar is really known for its very distinctive fragrance, and thus as the wood of choice for lining humidors, cigar boxes and cigar wrappers. Applications for the wood also include craft projects, high-end cabinetry and furniture, clothing chests, interior joinery, patterns, lead pencils, boat building, canoe decks and musical instrument parts.

Soft Maple (Tiger)

Soft Maple is a domestic hardwood. This wood resembles Hard Maple. It is close grained but it is much softer in texture. The sapwood color is creamy white and the heartwood is light reddish-brown.

Common Uses: This lumber is used for flooring, furniture, interior joinery, turner, decorative veneers, musical instruments and as an alternative to Hard Maple.

Yellow Heart

This beautiful exotic and imported hardwood is a bright yellow color, darkening only a little on exposure to sunlight. There is a little differentiation between heartwood and sapwood. The color is very consistent across the wood. It is usually straight grained and uniform. It dries easily with limited checking and cracking.

Common Uses: Flooring, furniture, knife handles, pens, scroll work, turnings, inlays and cabinetry.

Padauk

Padauk is an exotic and imported hardwood that comes in both a strip or a mottled effect. An eye catching wood, the color varies from a rich crimson or brick red, to reddish-purple streaks, to bright orange. It darkens over time to dark reddish-brown. The interlocked grain produces the striped figure on quartered surfaces. The texture is medium to coarse.

Common Uses: Padauk is used for joinery, turnery, furniture, inlay, flooring, knife handles, veneer and tool handles.

Zebrawood

This exotic and imported hardwood is pale golden brown to pinkish-brown with pronounced dark brown streaks giving the quartered surfaces a zebra-stripe appearance. The grain is interlocked. This wood has a coarse texture and lustrous surface. Zebrawood is heavy, hard and strong.

Common Uses: Zebrawood is used for cabinet work, inlay, marquetry, flooring, joinery and turnery.

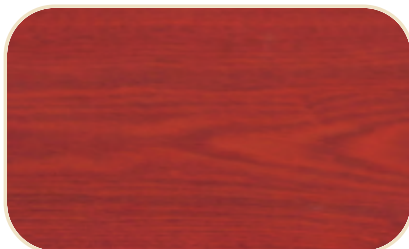

Exotic Hardwoods & Domestic Lumber

African Mahogany

Our African Mahogany is an exotic and imported hardwood that is figured "broken grained." It is characterized by vertical bonds of varying luster and vessel markings in which the ribbon effect is intermittent.

Common Uses: African Mahogany wood is used for furniture, joinery, paneling, boat building, cabinet making, veneer, plywood and wherever American Mahogany used.

Bloodwood

Although hard and tough, it works easily with hand and power tools. May need pre-drilling for nailing. Holds screws well. Glues, stains and polishes to a very good finish.

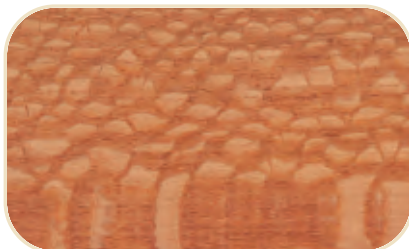

Durability: Durable and very resistant to preservative treatment.

Uses: Cabinetmaking, furniture, decorative inlay, marquetry work, fancy boxes, turning, veneers.

Butternut

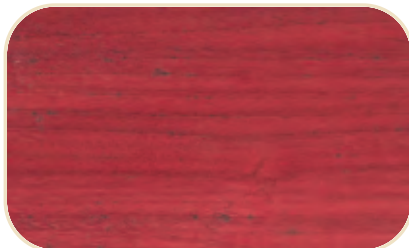

The sapwood of the butternut is almost white and usually quite narrow. The heart wood is light brown, often with pinkish tones variegated with different shades of brown. It displays quite a satiny sheen. It is relatively lightweight for most domestic hardwoods, has straight coarse grain and rather weak in bending strength. Once dry, the wood is very dimensionally stable.

Lace Wood

Works well with hand and macing tools, but there is moderate blunting effect on cutters and a tendency to bind in saws. Glues well, stains and polishes, with care, to an excellent finish.

Uses: Furniture, cabinetmaking, joinery, light construction, paneling, ornamental inlay, decorative uses. Excellent for turning fancy goods.

Purple Heart

Purple Heart is an exotic and imported hardwood that is strong and resilient, and has a uniform fine-to-medium texture. The grain is usually straight, but can be irregular. The wood is purple which darkens in time through oxidation.

Common Uses: Purple Heart is fantastic for turnery, chemical vats, heavy construction, flooring, billiard cue butts, handles and cabinetry. A dye produced from the wood is used for textile fabrics.

Sassafras

Sassafras heartwood is pale brown to orange brown, resembling ash or chestnut. The narrow sapwood is yellowish white. The wood has a coarse texture and is generally straight-grained. Well-known as an aromatic species. Used for furniture, millwork and mouldings, windows, doors, door frames and kitchen cabinets.

Hickory (Shagbark)

Shagbark Hickory is a domestic hardwood. It is the hardest, heaviest and strongest North American wood in common every day use. No other commercial wood has the combination of strength, toughness and elasticity. The texture is very coarse, the grain is usually straight but sometimes irregular.

Common Uses: Tool handles, lawn furniture, agricultural implements, athletic goods, ladder rungs and archery bows.

Bubinga

Moderately durable. Susceptible to attack from common furniture beetle. Heartwood is resistant to preservative treatment. Sapwood is permeable. Primarily used as a veneer for cabinetwork, furniture, and paneling. Also used for knife handles, and fancy goods.

Common Uses: Primarily used as a veneer for cabinetwork, furniture, and paneling. Also used for knife handles and fancy goods.

Birdseye Maple (Hard Maple)

Birdseye Maple is a domestic hardwood. The Birdseye figure is found in heartwood and sapwood. Both can be breathtaking. The boards are from Maple logs with irregular growth.

Common Uses: Birdseye figure can be used wherever un-figured maple is used. Wood with this figure is highly prized for stringed musical instruments, high end furniture, specialty veneers, cabinetry and countless other projects.

Wenge

Wenge is an exotic and imported hardwood that has heartwood that is dark brown with very close, fine, almost black veins. The texture is coarse and the grain is straight to slightly wavy.

Common Uses: Wenge is used for flooring, interior or exterior joinery, excellent for turnery, veneer, cabinets, marquetry and carving.

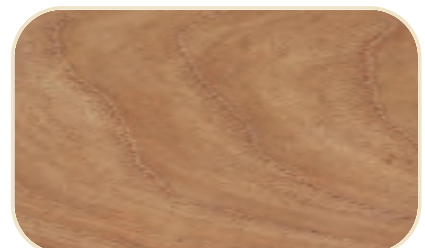

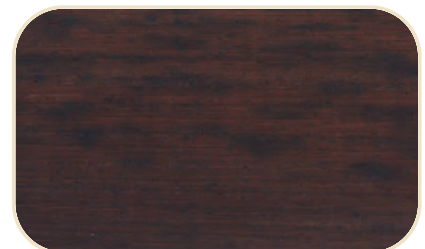

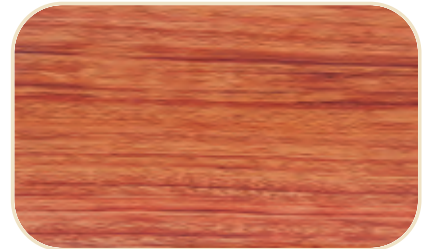

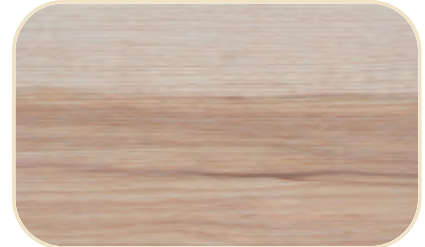

Teak

True Teak of Burma is an exotic and imported heartwood that is a uniform golden-brown color. Teak is generally straight to wavy grained, coarse textured and oily to the touch. The luster is dull. The wood has a distinctive smell. Teak has excellent strength properties which make the timber so suitable for structural uses. Teak has outstanding durability in regards to wet and dry conditions. It is hard, strong, heavy and very attractive.

Quarter Sawn Red Oak

The oaks have been key in America's industrial transformation: railroad ties, wheels, plows, looms, barrels and, of course, furniture and floors.

Main Uses: Furniture, flooring, architectural millwork and mouldings, doors, kitchen cabinets, paneling and caskets.

James Hardie

Home Siding Products & Styles

Enjoy your home. James Hardie fiber cement siding gives you a beautiful home that is also safe from environmental and accidental wear and tear, with a choice of up to 26 baked-on colors via our ColorPlus® Collection. James Hardie fiber cement siding is designed to last a lifetime, resisting cracking, rotting, hail damage, termites and many other possible problems.

We've created a range of innovative products resistant to flame, impact, moisture and more. The products we manufacture are technologically superior to anything our competitors offer, and we back that up with our warranty.

Innovation is vital to maintaining our pre-eminent position in the fiber-cement industry. Consequently, we invest heavily in research and development, with a special emphasis on product quality and production efficiency to develop durable and low maintenance siding products, backerboard and pipe.

James Hardie Building Products, Inc. is a worldwide leader in the manufacturing and development of fiber cement building materials. For over 100 years, James Hardie has been devoted solely to fiber cement technology and is America's number one siding brand, protecting over four million homes.

JamesHardie

James Hardie siding is a fiber cement composite material that combines the beauty of wood with virtually no maintenance. And unlike vinyl or wood composite siding, James Hardie fiber cement siding withstands everything Mother Nature can throw at it; fire, hail, high winds and blizzards, and driving rain. James Hardie offers a complete exterior home solution with siding (traditional lap, shingle and panel), trim, fascia, and soffit.

The ColorPlus Technology system was developed to complement our industry-leading siding, providing a complete siding solution. The ColorPlus Technology system combines a proprietary formulated paint with a multi-coat, baked-on manufacturing process. As the only company that engineers the materials and manufacturing process from beginning to end, we can ensure world class quality and industry leading performance. Compared to generic painting (including local third party pre-finished or painting) James Hardie ColorPlus Technology has up to two times more paint, up to 400% better paint adhesion, and resists fading up to 30% better. James Hardie fiber cement siding with ColorPlus Technology will last up to eight years longer and save the average household \$3000 to \$5000.

The James Hardie ColorPlus® siding products are unlike anything available on the market today. Whether you're building a new home or remodeling, ColorPlus Technology offers the beauty and durability of James Hardie siding products which are factory finished in a wide range of designer colors. They have a mar-resistant surface that resists scratches, peeling, chipping and cracking, as well as a proprietary finishing process that bakes on color to ensure that it stays fast. The James Hardie ColorPlus siding comes with up to a 50-year transferable limited product warranty, and a 15-year finish warranty.

Siding

Why Cellwood® Vinyl Siding

Just like the other products you use every day, vinyl siding has come a long way. Cellwood® uses the latest in PVC polymer technology and the best materials – like high technology proprietary resins and Kynar® thermopolymers to provide uniform color and gloss finishes as well as UV ray and harsh weather resistance.

When it comes to exterior cladding for your home, you can trust Cellwood®'s reputation for quality, durability, and style. And now, you'll find more choices than ever... new profiles, new colors, and the most complete line of accessory and metal products available today. Best of all, compared to other siding materials, our exterior products require the least amount of maintenance. That allows you to spend more time enjoying your home, not maintaining it.

Cellwood® Vinyl Siding

- Never needs painting or staining
- Does not absorb water
- Resists mold, mildew, and wood-boring insects
- Looks better longer by resisting impact, weather extremes, pollutants, and harsh UV exposure
- Cleans easily, often with just clear water and a garden hose

Siding

BETTER BRAND® E-PRIME™ features a single coat, zero VOC based primer system and is available in a wide range of trim boards, bevel siding, and pattern stock. Made from Paulownia, finger jointed and edge glued, E-PRIME is knot-free and fully reversible with a super smooth finish. It is excellent for use in interior and exterior applications and features a twenty year warranty !

- Superior Wood Fiber
- Paulownia, a soft hardwood
- Kiln dried
- Plantation grown, environmentally friendly
- Light physical weight
- Naturally resistant to rot, decay, and insects
- High strength-to-weight ratio
- High fire & ignition resistance
- High insulation properties
- No measurable extractive bleeding
- Dimensionally stable
- No measurable tannins, resins, or pitch
- Low shrinkage coefficient

Superior Coating System

Highest quality zero VOC primer is applied on all four sides and sanded after each priming.

About Paulownia

Paulownia is a soft hardwood that is native to China and has been used for over one thousand years in the fine furniture and construction industries. The heartwood is light in color and the sapwood even lighter. The color difference between the two is not distinct. The wood is without odor or taste and when sanded has the feel of spun silk.

Environmentally Friendly

Paulownia is predominantly plantation grown and considered a “green” product given its ten to twelve year harvesting cycles.

Wood Structure

The demarcation between heartwood and sapwood is not clear and the wood is straight grained and lustrous.

Wood Properties

Paulownia is comparatively soft and light in weight for a hardwood. Physical weight is slightly less than kiln dried western red cedar and two-thirds the weight of eastern white pine. It has a very high strength-to-weight ratio.

The shrinkage coefficient is smaller than most commercially harvested coniferous and broad leaf woods. The wood dries rapidly and does not easily warp, cup, end check, splinter or split. Movement in service is rated as small.

Paulownia has one of the lowest thermal conductivity values of any wood; therefore the wood has very high insulation properties. Low thermal conductivity contributes to the low shrinkage in use.

Paulownia is naturally decay and insect resistant. It has no measurable pitch, resin or tannins so it is not subject to extractive bleeding.

Working Properties

Paulownia is easy to work using hand or machine tools. It is easy to plane, sand, saw, rip, rout, and carve, and even during quick processing there is no danger of splitting or chipping. It easily absorbs glue, paint, and stains.

Shutters

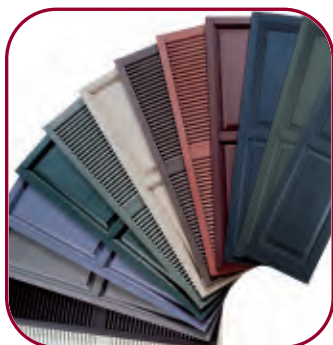

Cellwood® vinyl siding, shutters, designer accents, and mounts/vents provide you with many choices for low-maintenance home exterior products. Quality, durability, and style are the foundation for the Cellwood® brand, a brand inspiring confidence and peace of mind.

Cellwood® shutters add the finishing touch and personal style to your home. Our raised panel and open louvered shutters mimic the natural woodgrain found on real wood shutters – without the maintenance. Available in standard and custom sizes to fit virtually any window size.

Warranty

Cellwood® quality begins with an unsurpassed manufacturing process – resulting in products made to rigid specifications using only the best materials. This allows us to provide a lifetime limited warranty on our products.

Decorative Ceilings

Armstrong

Your ideas become reality

Ceilings For The Home

Your ceiling can define any room. It's the first thing you see in the morning. The last thing you see at night. Create drama. Peace. Inspiration. Or passion. A place of memories.

WoodHaven Ceiling Planks

Bring home the warmth and beauty of wood. Each new finish makes a one-of-a-kind statement that is as unique as your lifestyle and your individual taste.

Metallaire™ Decorative Metal Ceilings

Capture the 19th Century ambience of real tin ceilings with new Metallaire™ Decorative Metal Ceilings by Armstrong. Whether you're building a new space or renovating an existing room, one of Metallaire's 12 popular decorative metal patterns, six cornices or five backsplashes will add the crowning touch to any ceiling or wall.

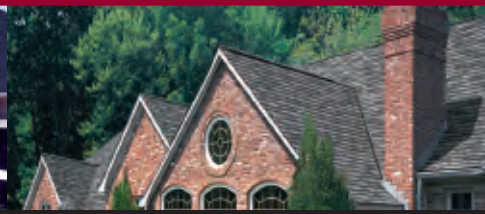

Ceiling Tiles

Armstrong offers a variety of suspended ceiling options in either 2'x2' or 2'x4' sizes. HomeStyle® mineral fiber ceiling panels are installed with a grid system while Metallaire™ delivers a tin ceiling look in either a lay-in grid or nail-up installation solution.

Room Dividers

Definitions™ Decorative Interior Accents lets you create a space without walls. These translucent, hanging room dividers are infused with natural materials and can be suspended from almost any ceiling.

Roofing Materials

GAF Materials Corporation has grown to become North America's largest manufacturer of residential roofing (sold under the GAF-Elk brand) and commercial roofing (sold under the GAF brand).

Professional installers have long preferred the rugged, dependable performance that only a GAF roof can offer, and have made it the #1-selling brand in North America. But our recent and rapid success in growing the company to nearly \$3 billion in sales has been based on a unique philosophy of "helping:"

For property owners & architects:

Helping to assure your best and safest choice in roofing

For our distributor & contractor partners:

Helping to build your business and avoid hassles

GAF's quality roofing products are regularly recognized by leading industry experts, including:

- Awarded #1 visual brand by *Life* magazine
- Fireshield® brand roof restoration system named "Best Product" by the editors of *Buildings* magazine
- Rated #1 in shingle quality by home builders
- Winner of the Builder's Choice Award
- Cobra® brand ridge vents rated #1 in quality by home builders
- Featured regularly in leading home and garden publications and on home improvement networks such as HGTV
- Premium designer roofing shingles have twice received the Architects Choice For Excellence Award

Columns

Drawing upon the enduring, classic design of Greek and Roman architecture, Column & Post proudly presents its complete line of architectural columns, posts, capitals and bases. At Column & Post, we combine ground-breaking technology with classical design to produce products that add style and elegance to your home while providing years of unmatched strength and durability. Our finely tapered columns are architecturally correct, and available in a wide range of sizes. These columns are ideal for either interior or exterior and come in round and square featuring our unique, raised panel option.

Our experienced staff boasts a collective total of over forty years of expertise in the composite, design and manufacturing fields. To insure our cutting-edge approach, we have developed an on-site mould shop to assist with facility production. While we offer a wide selection of columns and capitals in a variety of standard sizes, we can manufacture almost any dimension. We welcome requests for new designs, and we're constantly working with our customers to develop the products that meet their needs.

Our products have many advantages. Simply sand and paint to enjoy relief from insect damage, wood rot and design failure. At Column & Post we are committed to providing the most beautiful and enduring accessories available, and as evidence, we back each and every product with our lifetime limited warranty against defects in material and workmanship. When you combine the beauty, lifetime warranty and ease of installation, you'll find that our Column & Post products are the perfect choice for any project.

Columns

REEB

The traditional American front porch...it's where we welcome friends and family into our home. It's where we sit and enjoy their company. It's the place where we go to escape the stress of daily life and take the time to sit back, relax, and enjoy life.

HB&G offers a wide variety of porch products to help you create the design that best suits your way of life. Best of all, many of our products require little or no maintenance and come with a lifetime guarantee.

BWI® is a premier provider of fine millwork across the eastern seaboard. With over 400 employees, multiple locations, and a large fleet of vehicles, we are able to offer shorter lead times and a larger inventory than ever before. As a company, we are known for our consistent quality, exceptional customer service, and highly professional sales and support staff. At BWI®, our mission is to become the leading provider of fine millwork to independent lumber retailers offering the widest variety of quality products. Whatever our customer is looking for, we strive to deliver.

For over 20 years, Bridgewater Wholesalers, Inc.® (BWI)® has supplied specialty millwork to independent retail establishments, bringing builders and homeowners expertise and personal service.

Columns

Milliken Millwork, Inc. 
WHOLESALE DISTRIBUTORS

HB&G PermaCast® Columns are available in round or square. The round columns are fluted or plain, with or without the classic tapering of the upper two-thirds of the column. Square columns are available in a variety of styles as well, including plain or fluted, applied panel, recessed panel, or the craftsman style column. The PermaCast® capitals and bases are made from durable low-maintenance materials, and, like the columns, they maintain architectural authenticity and historical accuracy.

Aristokraft offers various wood types for kitchen cabinets, including maple, birch, cherry, oak and hickory, as well as thermofoil and laminate.

Aristokraft cabinetry is proud to offer the kind of quality craftsmanship and service that has earned us the distinguished Good Housekeeping Seal. When you choose Aristokraft Cabinetry kitchen and bathroom cabinets, you can rest assured that your choice is backed by a five-year warranty on all workmanship and manufacturing, plus a lifetime warranty on all drawers, drawer guides and hinges. Professional builders and homeowners alike enjoy our unique customer promise on what matter the most – affordability and reliable, on-time delivery.

Kitchen & Bath

Serving New Jersey and the Metropolitan Area since 1961

Better Plastics Inc. designs and supplies custom

- Kitchens
- Bathrooms
- Home offices
- Entertainment centers

Better Plastics is your single source solution for your kitchens, bathrooms, laundry rooms and entertainment centers.

In business since 1961, Better Plastics is the largest fabricator of post-form counter tops in New Jersey. We are the largest certified Swanstone solid surface fabricator in New Jersey, a regional distributor and fabricator of John Boos Butcher Blocks, a certified Corian fabricator and installer, as well as, an expert granite installer. That's why we say, "We're Tops in the Business."

We work with the finest cabinets Aristokraft and Kemper. You can depend on Better Plastics because we do all our manufacturing on the premises.

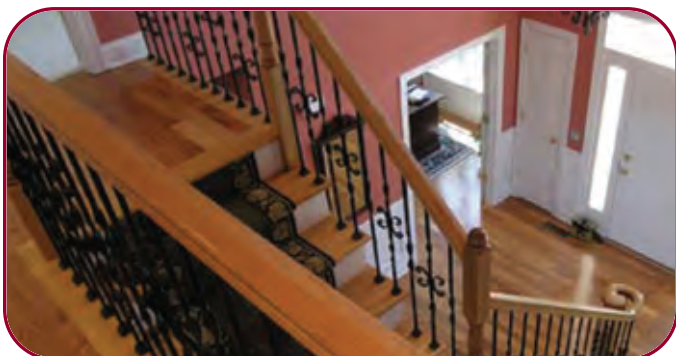

Stairs

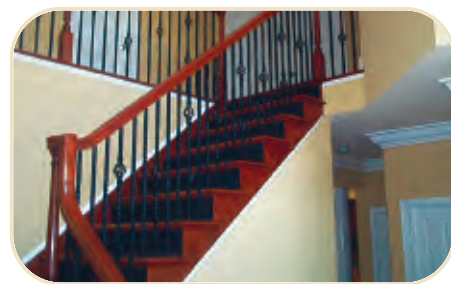

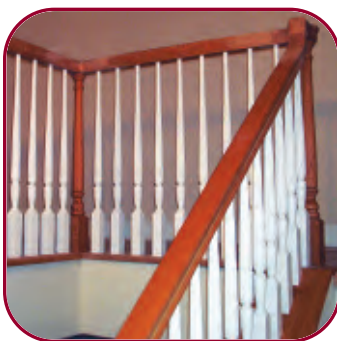

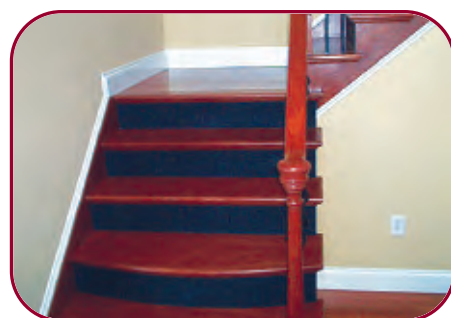

SNYDER
CUSTOM MILL
& WOODWORKING **STAIRS**

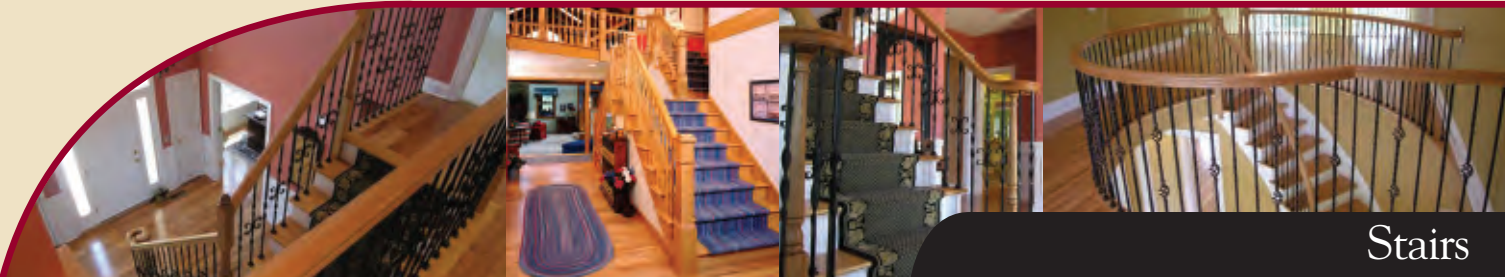

Quality Craftsmanship Since 1987

From circular stairs and curved rails, to simple pine stairs, Snyder Stairs builds a quality product at our shop located conveniently in Easton, PA. Since 1987, Snyder Stairs has provided many quality builders, craftsman, and lumber companies with ready-to-finish stairs and rails for new homes, additions, and renovations. We would welcome the opportunity to serve your needs with our friendly service. Estimates through phone, fax, and website are available for your convenience.

Valley Stair & Rail is a family owned business that manufactures box stairs, open stairs, flared stairs and custom curved stairs. The stairs are all built on site in our stair shop located at 23 North Park Avenue in Mertztown, PA 19539. VSR offers a wide variety of wood species to choose from and we are able to service the retail lumber yards in Northern and Southeastern Pennsylvania along with parts of New Jersey and Delaware. VSR distributes stair and rail parts from the facility in Mertztown and offers installation of stairs and railing systems.

Stairs

L.J. Smith products are defined by their unique design – providing uncompromised durability and good looks. The exclusive features of our designs result in unsurpassed strength and the benefits are simply endless. We just can't say enough about our first-rate innovations.

L.J. Smith is the "one stop shop" for everything needed for your stairway...from our individually crafted component parts to our exclusive offering of innovative tools for installing them. Nowhere will you find a selection that even comes close to the vast array of styles available from L.J. Smith.

Hardware

The Top Notch goal was to open our doors to you every day. The doors have been open since April 23, 1975. The goal continues! As a company, we act with integrity and loyalty, recognizing that quality service begins with quality people. No other company carries the quality and quantity of architectural hardware styles and finishes, ready for immediate shipment. Top Notch is committed to total customer satisfaction every moment of every day.

Top Notch continues to build on its service reputation with three convenient distribution points, personal sales and customer service support, stocked products shipped within hours, 99% + accuracy rate, and full service keying. Our salespeople are ready for your call with the product knowledge and inventory to fill your every need. Each day we open our doors to exceed your expectation.

Emtek locks have heavy duty mechanisms designed to provide trouble free service. Knobs and lever handles are supported by springs mounted behind the rosettes and sideplates. These springs return the handles back to the "rest" position and prevent lever sag. Latches are heavy duty diecast construction, with strong internal springs, solid brass nose bolts and sintered metal cams. A plastic bushing located in the joint between handle and rosette ensures a friction free wear surface. The threaded tubes inside an Emtek lock are machined brass, not steel. The use of brass ensures good threads and prevents corrosion for easy installation and long life.

Hardware

Imitation may flatter, but it can never replace an original for quality and innovation. Baldwin made solid forged brass the standard of excellence, married style and security in pioneering mortise locks for virtually every important architectural style and created new finish options to deliver dozens, even hundreds, of looks. Together, with a consistent standard of fine brass engineered in a multi-patented breakthrough Baldwin Lifetime Finish,[™] Baldwin can promise “Beautiful for 100 Years.”

For over 85 years Schlage has provided homeowners with innovative quality security products. Today, Schlage offers home security solutions from a wide selection of mechanical and electronic security locks and accessories in touch with modern lifestyles.

Floor Protection

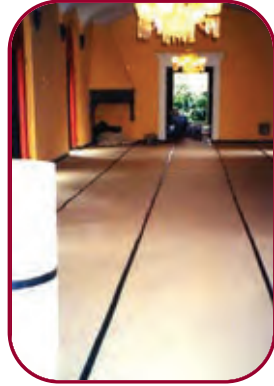

Ram Board is a heavy-duty, Flex-Fiber reinforced temporary floor protection designed for contractors. It protects new and existing floors while allowing moisture, vapors, etc. to escape for curing. It is engineered to protect colored concrete, tile, stone, linoleum, wood, etc. from damage while construction activities take place.

Ram Board has been tested extensively in the construction and entertainment industries. It protected floors while filming on the sets of several movies, including Spider-Man and The Hulk. Kroger, owner of Kroger, Ralphs, and Food 4 Less grocery markets, has Ram Board named for floor protection in their building specifications. It has also protected floors on several Wal-Mart, Pottery Barn, Pei-Wei Asian Diners and hundreds of residential projects.

Ram Board comes in rolls 38" wide and 100' long (317 sq.ft. of coverage per roll) and weighs approximately 50 lbs. It can be laid out very fast, saving on construction time while helping contractors stay on schedule and budget.

- Temporary floor protection
- Heavy-duty
- Thick, Flex-Fiber Reinforced
- Lays fast and flat
- Roll size: 38" x 100' (317 sq.ft.)
- Weight (Approx): 50 lbs.
- Thickness (Approx): .05"
- Save on damage repair
- Re-usable

Wood - Tile - Concrete - Marble - Terrazzo - Stone - Etc.

Prefab/Engineered Lumber

Don't Flitch Around!

Take the hassle out of building it yourself. Eliminate hours of unnecessary labor. Take advantage of the features of Better Header®. Stronger flitch plate headers (the original engineered lumber) pre-fabbed sandwich plate system requires no assembly. Quick and easy with no furring. Ready to finish. Less expensive than building it yourself. Custom cut to your length. Most beams shipped in 72 hours.

Only Better Header® offers you the patented PFS Fastening System

Designed by engineers and manufactured in-house at our state-of-the-art facility, this multi-angle, pre-fitted steel nut allows for maximum compression without compromising the structural integrity of the lumber. The PFS system, combined with grade 5 bolts, provides the ultimate strength and eliminates the need for furring, making every project a success.

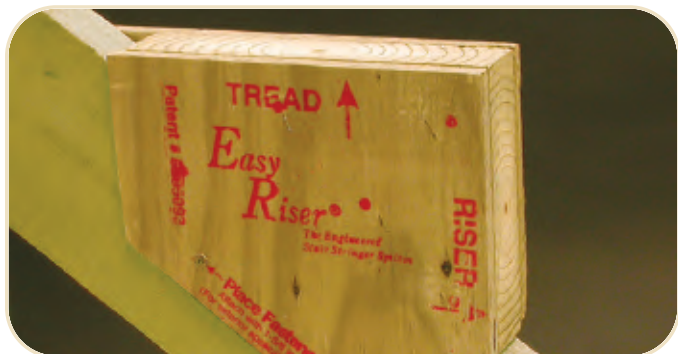

Better Header is part of a group of cutting edge, innovative companies with over 50 years of experience in the steel, custom fabrication and hardware / fastener business. With an emphasis on customer service, Better Header offers a full line of custom products, eliminating the problematic task of on-site fabrication. With three facilities, state of the art equipment and over 75 experienced and well trained employees, the end result is a line of products of unmatched quality, strength and value.

At Better Header we stand behind our products so you feel safe standing under them.

Prefab/Engineered Lumber

Universal Forest Products®

Universal Forest Products® is the nation's leading manufacturer and distributor of wood and wood-alternative products to retail/dealer, site-built construction, manufactured housing and industrial markets.

Universal is the leading producer of pressure-treated wood and North America's largest manufacturer of engineered roof systems for manufactured housing and site-built construction. The company is America's leading buyer of solid-sawn lumber and the largest customer of North America's largest mills. That translates into exceptional purchasing power, which is just one of the many benefits Universal customers enjoy.

Serving customers large and small

Universal's national presence allows it to serve retailers, builders, and manufacturers who are growing as a result of industry consolidation and who seek strong national partners to meet multiple needs. Because the company has locations coast-to-coast, it also serves smaller, independent businesses and helps grow their success.

The spirit of Universal

The approximately 10,000 people of Universal thrive in a culture of integrity and respect and are driven by a collective entrepreneurial spirit. We're not afraid of the hard work it takes to hit our goals (in fact, we rather enjoy it). And we take pride in being known for doing what we say we're going to do, time and time again.

An employer of choice

The people of Universal are exceptional – they have a strong work ethic and a collective determination unparalleled in American industry today. The company's senior management enjoys virtually zero turnover – most senior executives have been with the company for decades – which accounts for the breadth and depth of the company's knowledge and relationships.

Prefab/Engineered Lumber

Manufactured Housing

Universal Forest Products' manufactured housing business unit specializes in one thing: providing you with innovative, high-quality wood components. We have spent over four decades working hand-in-hand with manufacturers. As a result, we now offer the most comprehensive range of products and services in the industry. All designed to get you the components you need, when you need them.

As part of the nation's leading wood products company, we have the financial strength and stability to support your business in good times and bad. Because we have strong relationships with North America's major softwood mills, we can obtain the wood fiber to provide you with the components you need, when you need them.

To stay on the leading edge, we conduct our own truss research, maintain our own staff of engineers, and seal our own drawings. We provide the information you need to stay on top of industry changes and take advantage of new technologies as they become available.

Site-Built Construction

As the nation's leading manufacturer and distributor of engineered wood components, Universal Forest Products is creating a seamless, single-source supply network. That network, combined with our experience in building components, provides you with high-quality products, efficiency, and service.

Our network of reputable suppliers, in addition to our design and engineering, and distribution expertise, means we can improve your job scheduling while helping you improve the way you build. That translates into greater efficiency, greater profit, and greater growth.

We are committed to helping your business grow by continuously improving the efficiency of everything we do.

Universal Forest Products®

Fox Services

Fox Lumber & Building Materials, family owned and operated since 1905, provides contractors and homeowners throughout all of New Jersey and eastern Pennsylvania with quality materials, competitive prices, and outstanding customer service that is second to none. At Fox Lumber, we know how to treat our customers – we've been doing it for over 100 years! We pride ourselves on making sure that our clients have the materials and information needed to run their businesses as efficiently and seamlessly as possible. Our knowledgeable staff is here to assist you in selecting the proper materials for your project, coordinate deliveries, offer advice, and more. Choose Fox Lumber & Building Materials as your one stop shop for all of your building needs. In addition, Fox offers other products listed on the adjacent page.

Boom Truck & Moffit Delivery

We offer a free boom truck delivery, used for booming shingles onto a roof, or placing a delivery right where the customer wants it and gives us the ability to unload fragile items without damaging them.

Delivery

We do not charge for delivery within our service area, which includes north, central, parts of southern New Jersey, and portions of eastern PA. Customers should call to see if our free delivery service is available in their area.

Estimating & Copying Service

We offer a free blueprint takeoff service, which gives the customer a comprehensive list of the materials needed to complete the job. We takeoff anything from small decks to large homes.

Advice

We encourage customers to call with any questions or concerns that they may have so we can advise them on what material they should use for their job, or how to do a certain job.
